

## **Compu-Lift**

The Compu-lift is a non-surgical face-lift that delays the aging process by the use of bioelectrical currents found in the body. The treatment reaches down to the facial muscles to tighten and lift.

Compu-lift can be complimented by Microdermabrasion to produce more stunning results. Also please inquire about our multi-treatment packages available at a reduced rate.

## **Microdermabrasion**

Microdermabrasion is a new and technically advanced method of rejuvenating the skin and producing amazing results for removing or reducing skin blemishes such as acne scars, sun damage, stretch marks, wrinkles, fine lines, and liver spots. The skin becomes cleaner and looks softer. This process is being used in lieu of laser surgery and is a non-invasive treatment. Multiple treatments are recommended to see maximum results.

## **IPL Hair Removal**

Pulse-light systems work by emitting pulses of intense lamp-light into the hair follicle. The heat then loosens the hair and disables the cell responsible for growing new hair.
